### ABOUT ME

I am an innovative developer with experience in building and maintaining many applications across diverse industries. I am proficient in Java, JavaScript, Golang, .NET and Ruby languages, along with many modern libraries and frameworks. Furthermore, I also have experience in working with large data sets and possess a working knowledge of multiple different types of databases. I am passionate and confident in my strong problem-solving skills and technical expertise. Finally, I am always eager to contribute my skills and collaborate effectively with my colleagues.

### EDUCATION

#### SOFTWARE ENGINEER

VNUHCM - UNIVERSITY OF SCIENCE | 07/2019 - 07/2023

GPA: 8.63/10

### WORK EXPERIENCES

#### Backend / Fullstack Developer

KMS TECHNOLOGY | 09/2022 - NOW

- Responsible for design system logic by analyzing system performance standards to make it perform efficiently.
- Conducted research and develop APIs for the CORE BANKING system of the KTC project.
- Integrated JSP and Thymeleaf framework in Java to create the frontend and focused on enhancing user experience for the entire website.
- Worked as a full-stack engineer, utilizing React.js for the frontend and Ruby on Rails for the backend to develop SHOUT FOR GOOD system.

#### Front-End Developer

FPT TELECOM | 08/2022 - 09/2022

- Responsible for building and maintaining websites, including the development and upkeep of front-end functionality.
- Developed and continued to maintain the whole website, actively contributing to the enhancement of user experience and overall functionality.
- Collaborated with cross-functional teams to implement React.js and other innovative technologies to align with industry trends and user expectation.

#### Fullstack Developer

DOCUMENT EASY COMPANY | 09/2021 - 07/2022

- Collaborated with the development team to design and implement a cutting-edge real-time chat system, seamlessly integrating Java backend technology with spring boot framework and JSP (JavaServer Pages) to facilitate instantaneous communication, enhance user engagement, and deliver an exceptional interactive experience.
- Developed and maintained WordPress websites, harnessed the potent combination of the ReactJS + Next.js framework

## PROJECTS

### SHOUT FOR GOOD

04/2023 - NOW

Description: A platform for charities to host public or private, silent or open auctions. Technology: Reactjs, Ruby on Rails, MySQL. Position: Full-stack developer. Details:

- Crafted and developed system features with a focus on coherence and logical structure, ensuring a user-friendly experience for both organizers and participants.
- Collaborated closely with the team to conceptualize and analyze solutions for complex challenges within the system, contributing to its growth and effectiveness.
- Efficiently managed and executed data migration processes, enabling smooth transitions and optimal data organization for improved performance.

### KTC CORE BANKING

10/2022 - 07/2023

Description : A platform for the CORE BANKING SYSTEM in New Zealand

Technical: Java, Jsp, Spring Boot . Details:

- Created and modified APIs for the CBS Team, establishing a robust connection between the APIs and the frontend UI.
- Ensured smooth communication and data exchange between various components of the CORE BANKING SYSTEM, ensuring high performance and reliability.
- Collaborated with the development team to integrate JSP and Thymeleaf frameworks in Java, resulting in a seamless and user-friendly frontend for the platform.

### MULTI-THREADED SOCIAL NETWORK CHAT APPLICATION

01/2022 - 07/2022

Description: A dynamic and interactive social networking platform utilizing socket communication. Technology: Java, Jsp, Spring Boot. Details:

- Designed a server with multiple thread for connecting
- Enabled concurrent connections from different locations to a unified application, creating a seamless and engaging user experience. Users can interact and communicate in real-time regardless of their physical locations.
- Integrated real-time messaging capabilities, enabling users to exchange messages instantaneously.

### EDUCHECK APP

09/2021 - 01/2022

Description: An attendance program catering to both teachers and students.

Technology: Java, Thymeleaf. Details:

- Implemented an intuitive and aesthetically pleasing user interface, promoting ease of use and accessibility for teachers and students alike.
- Incorporated real-time notifications to inform teachers and students of important updates or changes in attendance status, enhancing communication and engagement.

## ACTIVITIES

### Google Development Student Club - HCMUS

HEAD OF FRONTEND | 05/2022 - NOW

Participated and managed the development frontend process.

### Google Developer Groups Cloud VietNam Season 5

Facilitator | 31/03/2023 - 31/04/2023t

Guided and supported others within the Google Cloud ecosystem.

### Head Of Developer Team - ITConnectUS

Leader | 02/2022 - NOW

As a leader, I orchestrate team efforts, allocate tasks effectively, foster collaboration, and try my best to drive project success.
